

# HDPE & PET Bottles

**HDPE Bottles** are durable and wide range of packaging options, HDPE bottles are proven for their exceptional moisture vapour barrier properties and rigidity.

**LDPE Bottles** are used in pharmaceuticals, food, beverage and personal care products due to their lightweight and flexible nature.

**PET bottles** are commonly used for packaging liquid medications, syrups, and vitamins due to their transparency and moisture barrier properties.

**PP bottles** are preferred for packaging powders, tablets, and capsules because of their high heat resistance and moisture barrier properties.

**Products available in various sizes as per customer requirement**
