

Child Resistant & Tamper Evident Caps

CRC caps are made of high-quality plastic and require a specific motion to open them, ensuring the safety of children. These caps are generally used in specific prescription medicines to avoid contact of children from drug.

CT caps, or continuous thread caps, are precision-engineered closures designed for both plastic and glass. They meet industry neck finish standards for interchangeability and capping efficiency, ensuring a tight seal for products.

Products available in various sizes as per customer requirement.
